## Customer Reviews

The subtitle of BOBBI BROWN MAKEUP MANUAL indicates it is for the beginner to pro and I'm in the beginner category. All I'm interested in is doing my own makeup well. As a user of Bobbi Brown makeup for over ten years, I wanted to read this book to see what I could improve as formerly I was just applying the makeup as instructed by the BB counter saleswoman instructed me. I didn't know

why I was doing what I was doing until I read this book. The bulk of the book (the first 138 pages) is designed to be used by both individual women for their own makeup and can also be used by professionals. After giving some brief opinions and recommendations on which products or product types to use on various skin types or for different purposes (such as when to use cream blush versus powder blush for example), clear directions for applying the makeup properly are given in brief text along with full step by step directions. Important to note is that all skin colors and different ethnicities are included. Special techniques for Asians are given such as handling eye makeup. I was happily surprised to see special advice given for women with freckles, the advice is to not cover them up completely but to use special makeup effects that allow them to show through. Also covered is how to handle makeup with skin conditions such as rosacea and others. A section at the beginning gives information about brush selection, the importance of proper brush maintenance, and the reasons to use high quality brushes. Advice on compiling makeup kits is included, specifically, what items to buy and how to organize them for different purposes (travel, everyday use, and so forth). I was impressed also with the section about eyebrows and eyelashes.
