## Customer Reviews

I don't wear makeup everyday, so I never thought I'd get a book about "mastering" it. But I watched a couple video tutorials on the Makeup Gourmet Facebook page and was sold enough to get the book, which has been perfect for me. The author is so refreshing and totally different from the sales hype you get at a cosmetic counter. It's like he's on your side and he knows how to take the mystery out your whole relationship with makeup. I actually felt really RELIEVED after reading this book. It took away all the guesswork and now I'm confident about what makeup is right for me and how to enjoy using it. (And bonus, now I know which products and advice I can skip). I love how I look and have gotten compliments about looking "rested" and "happy." This book lives on my bathroom counter and it's designed to be used that way. Even the pros use it, which intimidated me at first, but once I started using the book I never thought about that again. It is easy to follow and makes sense. You actually learn why makeup does what it does and it's interesting to see things like lines,

shades, shapes, and contours explained. I also like that this book's definition of beauty is about enjoying and expressing your true self vs. trying to cover up or look like some magazine cover. Again, very refreshing.

This is an awesome makeup book. The techniques are sound and easy to follow. I must have 50-100 makeup books and this is my favorite-yes, even better than Kevin Aucoin! (Kevin's books are lush, but not too much insider info.) There are little tips and tricks I have never read in another book (how to properly apply color corrector, how to "Bambi" the eye for example) The only downside is that there are typos and spacing issues. Still worth it though.

Unlike the Bobbie Brown books, Christopher Hopkins' book, and the Makeup Wakeup, this book gives clear and concrete instructions on how to apply makeup: specific techniques that, with the help of the free accompanying YouTube videos, you will be able to apply. He does not get into specifics for particular issues beyond skin tone, but the basic technique and method for mapping the face apply to all faces, whatever age or shape.

I ordered this book last week, I received my copy Friday, I am so impressed with this book. I have read and attended a makeup training program, (80 hours). I learned a lot about color and technique, but when I started reading this book, WOW, at least for me so much of the other information I learned all of a sudden started to make sense, I had the basic knowledge of HOW, but when I started to read and understand to ask and see the WHY. Thank you Chris Scott for sharing such a valuable secret in the "Face with a Heart"

Really first book EVER to show how to do makeup with links to how-to videos on the author's website for each part if needed. Finally had the opportunity from a book to learn and understand what to do. Why don't other makeup artists include this information in their books???

Really well written and informative book. Love his different approach. The complementary videos are awesome! I learned a lot! Maybe I missed it but the only thing I didn't see was how to choose eye shadow colors. Perhaps this will require a whole new book....which I'll buy immediately!

Ever since I first discovered Chris Scott's MakeupGourmet video tutorials I've been a fan. His explanations are clear, to the point and very usable for the regular woman. I have yet to apply his

new method, but reading the book it made a lot of sense.

Great book! I've been using the techniques in this book for a few months now. I'm surprised every day with the compliments I receive --i.e., my skin looks brighter, I look much younger, even that I look beautiful. I'm only sorry I didn't understand before how to put my efforts to better use. It's much more satisfying to put on makeup now. Also, I don't look like I'm wearing too much makeup. I have a casual, natural look. Great book. I especially like the specific techniques, the overall principles to them, the best brushes to buy and what step are ok to skip if I'm short on time. BTW, I've purchased some products from the author's website and they're better priced than I've found elsewhere and the quality is great.
