## Customer Reviews

This book is just plain awful. The reviewer from Gurnee, IL is absolutely correct in his appraisal! He was actually very kind to give it 2 stars because it borders on being an outright fraud. I am an experienced and knowledgeable video poker player. I have studied video poker strategy in depth and have several useful books and other materials. The reason that I purchased this book is because of its recent publication date as the books and materials that I have are 5 or 6 years old and do not cover many new games and variations of older games. Unfortunately for me, this book was no help at all and would be totally worthless to anyone new to video poker as well as to experienced players like myself. Follow the advice of the Gurnee reviewer as to reliable authors. This book is about 350 pages but that is due to the writer repeating the same material over and over in an effort to stretch it out and make it look substantial when it is not so at all. Sentence after sentence he makes the same statement with small variation and continues page after page.

The par sheets which he claims are so valuable are of no practical use at all and account for about 30 pages. Other useless fillers are obsolete pay tables along with pictures of the machines. This book is also full of errors such as contrasting 2 pay tables for a particular game when they are actually identical, probably due to a typo. And here is a really good one: he states on page 266 that if you are dealt AA22 and draw one card that there are 6 cards in the deck available to give you a full house, namely 3 aces and 3 deuces! He offers a "simple strategy" which is just plain idiotic. In order to play these games properly you need detailed strategies specific to each game and pay table.
