# Nurse Practitioner's Business Practice And Legal Guide (Buppert, Nurse Practitioner's Business Practice And Legal Gu)

## Synopsis

Now in its Fourth Edition, best-selling Nurse Practitioner<sup>TM</sup>'s Business Practice and Legal Guide continues to provide a solid foundation for students and practicing nurses to build confident and effective practices. A must-have resource for every new or current Nurse Practitioner (NP), it defines what an NP is and does while explaining the legal scope with specific state and federal regulations. Completely updated and revised with crucial state-by-state appendices, Nurse Practitioner<sup>TM</sup>'s Business Practice and Legal Guide, Fourth Edition offers expert insights on prescribing, hospital privileges, negligence and malpractice, risk management, health policy, ethics, and measuring NP performance. Further, it addresses important issues such as: \* Developing an employment relationship \* Undertaking a business venture \* Giving testimony before the state legislature \* Composing a letter to an insurance company about an unpaid bill \* Teaching at a school of nursing \* Serving as president of a state or national organization Included with the print book is a CD-ROM with customizable evaluation forms and plans. Don't forget to visit our new NP certification website: [www.NursingCertificationSuccess.com](http://www.NursingCertificationSuccess.com)

## Customer Reviews

This book is a great way to access state-by-state information related to NP practice. I do recommend that readers not solely rely on its information. They should still contact each state's board of nursing. I found discrepancies between Ms. Buppert's requirements for practice in Ohio and actual law. Overall, I highly recommend this book to both NP students and clinicians.

The text book is very easy to read, and provides good information. It is a book that will be useful in the future. It includes information on each of the different state's rules and regulations for practicing as a practitioner.

I found Carolyn Buppert's second edition of Business Practice and Legal Guide to be very helpful. The additional chapters are useful for my practice and for research on a state wide level. I would recommend this book to nurse practitioners and students of the profession. It is proving to be a valuable resource for improving NP practice in Alabama. Be sure to get the second edition (2003/2004) as the first was published in 1995.

As a grad student interested in starting my own practice upon graduation, I found this book to be useless. It has been reprinted by another publishing company and its original copyright date is 1999. Between then and now - 2004 - a lot of things have changed. Therefore, I would recommend that anyone who requires current information should look elsewhere. This is a very expensive book as is not helpful at all!!!

This book is filled with practical, business-oriented information that nurse practitioners need. It is very easy to read and has state-by-state information listed at the end of chapters where it is relevant.

Not worth the money. The information contained within can be found by doing simple searches on CINHALL and locating scholarly articles. Used this for a class and felt that it was not worth the time or money.

Good, but missing some essentials ... might get diluted with her audience being those who are independent as well as those who work in groups/larger systems. Addressing the comprehensive needs of the truly independent provider, even the solo provider, is lacking. Also, a new version just came out, so maybe some of what this one missed is included. Also, having a single-payer health care system and standardized scopes of practice aligned with the Institute of Medicine's recommendations in their Future of Nursing Report would go a long way toward cutting out about 70% of the administrative/legal/reimbursement red tape and waste that currently exists in the "health\*care(?)" system that is anything but provision of services that contribute to individuals

health!!! Instead, we keep this dysfunctional system to protect the turf of certain providers and maintain the exorbitant profits of the "health\*insurance(?)" plans. I think both of these groups are ensuring/insuring is their own continued profits and power!

I had the pleasure of reading this book while finishing my last year in nurse practitioner school. Ms. Buppert is a master in defining how to negotiate business contracts. I met the author at a nurse practitioner conference in Nashville Tn and she was very down to earth and truly magnificent in her knowledge of laws affecting nurse practitioners. I highly recommend this book.
