## Customer Reviews

A short portion of this book reads as follows: RSSTU rusts truss RSSUU Ursus RSTTU strut sturt trust RSTTY tryst RSTUW wurstlf given a set of letters, it's easy to navigate to the length of the letters, and then to the section that will contain those letters. Of course, there are several sites and programs that can do the same thing. Crossword Compiler and wolframalpha are two of the tools I use when I make puzzles. CC only allows one instance, though, so this is useful for me as a second item. That lets me make anagrams like the following: "Dream is Collapsing" from the movie

Inception == Time for (Van (In a (microcosm) hotel) dip) sleeping. Scare the living daylights out of = Dogfight overenthusiastically. Entry of the Gladiators = Target day for the lions. Petroleum's prices = Complete surprise. Marco Pischorn = Capricorn shmo. Recommended. Wordplay is fun.

If you are loading this ebook into your Kindle, you can disregard the instructions on how to access anagrams. You still have to work out the alphabetically ordered version of your word. But once you have done that you can enter that as a search term. Because the Kindle has indexed your ebook, the search takes you immediately to the right spot. Beautiful. (This doesn't work well on the Kindle app, because the app doesn't index ebooks. The search looks through the ebook page by page. Doing the manual method is probably faster.)

I love this but have found an error in the indexing. For example, on the 7-letter Alphagram index, you can select ADA-ADD but cannot select the subsequent ADEA-ADEJ. I think the problem has to do with ADA-ADD as when you click on this you only start on ADD. Please fix any similar problems and allow me to download an amended copy.

I haven't had a chance to "play" with this book very much, but from the little I've "played", I like it!
