Goodnight iPad: A Parody For The Next Generation

Synopsis

In a bright buzzing room, in the glow of the moon-and iPhones and Androids and Blackberries too-it is time to say goodnight... Modern life is abuzz. There are huge LCD WiFi HD TVs and Facebook requests and thumbs tapping texts and new viral clips of cats doing flips. Wouldn't it be nice to say goodnight to all that? Like the rest of us who cannot resist just a few more scrolls and clicks, you may find yourself ready for bed while still clinging to your electronics long after dark. This book, which is made of paper, is a reminder for the child in all of us to power down at the end of the day. This hilarious parody not only pokes loving fun at the bygone quiet of the original classic, but also at our modern plugged-in lives. It will make you laugh, and it will also help you put yourself and your machines to sleep. Don't worry, though. Your gadgets will be waiting for you, fully charged, in the morning.

It is so much fun to go back and read children's books. The simplicity and beauty of the story and illustrations are a joy. Goodnight Ipad is a parody of the much beloved Goodnight Moon book. Those of us who have had to battle teens over shutting down their electronics and just reading a book will find the humor not only in the words, but also in the illustration. And if you look close, even the daddy is a bit troubled by having to give it all up for the evening. A sweet fun book that you will not mind reading over and over to your young ones.

Goodnight IPAD is a delightful, fun parody on the classic Goodnight Moon. I love the book itself. My

low rating has to do with the quality of the binding. I am an elementary school music teacher and used this book as a read aloud. It fell apart almost immediately.

As a parent who read this book to 2 kids now grown with children of their own, it was a blast to see and enjoy this parody (with a lot of truth in it). My son, now 29, laughed out loud and enjoyed both the text and the illustrations. His kids, aged 5 and 2 loved the illustrations, though they didn't quite get the joke. I was able to point out the differences by holding and reading their own copy of Good Night Moon as we read this new version. BUT-----the book fell apart!!!! After only a week of use, with only adults handling and turning pages, half of the pages separated from the binding. I contacted , told them my problem, and a new complementary copy was sent to me, with a free shipping label to send back the damaged book. Let's hope the new copy stays intact long enough for my grandchildren to read to their children!!!!

A very entertaining and clever book. My three year old loves it (and loves Goodnight Moon), yet is too young to really appreciate the humor. But he knows what Angry Birds, smart phones and tablets are, and he gets that we have to put those away to have a proper bedtime story (he thinks it's so funny that the little bunny on the last page is reading Goodnight Moon--"That's what we do at bedtime!") Notice 2001: A Space Odyssey on the LCD Wi-Fi HD TV? The obelisk and the monkeys...A very clever message to any adult reader who notices. A good present for technophile parents.

Gave this to my granddaughters for Christmas. The youngest one felt the wrapper and said it was probably a boring old book. Once she opened it I had her read it to us all, and she was laughing all the way through. Very clever and nostalgic for all of us who spent hundreds of hours reading Goodnight Moon.

The story line and the graphics mimic the original to a tee. Love the current jargon and techno savvy commentary. Wonderfully executed. Had to purchase it for my grandson, but I feel his Mom & Dad, (software & electrical engineers) are going to love it too. "Goodnight Moon" was my son's favorite and he reads it so often to his own son. This will make a great Christmas gift for all on your list!

A take off on the ever popular Goodnight Moon, this is certainly a timely publication. Among the younger population, and older too, for that matter, the iPad is now a way of life. Some users must

even take their gadgets to bed with them. And, it is always a good idea to publish a book that will encourage children to pick it up to read. Goodnight iPad should prove to be one of them. I bought this book and gave it to my daughter who is a teacher of elementary grades. I think they will enjoy it.

Good Night Moon was a favorite in our home for my youngest. When I read this one I had to have it even though my youngest is no longer little. It's just a really cute book. So if you like Good Night Moon and for those of us who have watched as we went from no smart gadgets to everyone having them you will like this book.
