Customer Reviews

This review is only of the book and the simple Mini System that is included. I did not opt for the Mega System which requires about \$1200.00 to acquire and train with the author. The Mini System is easy to learn and the author claims that it wins 100% of the time if played correctly. I have been playing roulette for a long time so I put the Fly Me to the Moon Mini System to the test and it failed.While it is true that you do win a lot of the games, the occasional losses take away the profits if played for the long term. There are two other little systems mentioned in the book; one for betting the opposite side of the wheel where the ball landed. Claims to work 50% of the time---even it that were true with the 0 and 00 it cannot be a long term winner. And, finally a little system for finding a wheel rotating at a 4 second revolution. I found a auto-wheel on Smart Live Gaming Casino that does spin at this rate, but the system failed under test. The Mega system is about tracking wheel

speed and the speed at which the dealer spins and releases the ball. There are many systems on the market that do the same. I have tried several and had no luck with them, but I will make a review of the Fly Me to the Moon Mega system, because I do not want to pay the money for the training. I have already purchased the Genuine Winner System for over \$2000.00 which follows the same parameters and have had no luck with it.

Although the ideas that underlie the supposed system are sound, nowhere in this book the workings of an actual system are explained. Yes you are invited to follow a 1500\$ course near the end, and you get a generous 10% off if you bought the book, but chapters as short as introductions in regular books, leave me no other option than write a review as some form of warning to future buyers...I expected quality standard to be a lot higher at .

The author clearly states that you will receive a pdf file and skype, email, phone help when you purchase his book. Once you get the book you will find no helpful content whatsoever and at the end he tells you that you have to pay him \$1200 for his real book and help. Can you say scam?

I purchased the book last week and found the information contained very informative although I did have some questions. I contacted the author whom responded way faster than what I expected. Not only did he answer all the questions but he took the time to follow up days later to make sure that I understood everything to help me avoid losing money. I have been practicing ever since by going to the casino and watching the wheel. I never thought it was possible to predict a roulette wheel. After much practice this past week 85% of my predictions come up. Best \$3.00 ever spent!
