Roulettechess: A Technology Of Systems Play For Roulette

Synopsis

Roulettechess is a unique roulette textbook with over a hundred American and French flexible game strategies, including basic roulette table managing instructions. The strategies are designed to show players how to be more competitive by selecting one or two offensive and defensive number combinations for continuous play. A preferred strategy, as selected by a player, might be based on wheel coverage, a level of risk, simplicity of system layout, return on wager, manageability of strategy, flexible strategy used for both American and French game, design layout of offensive/defensive and losing numbers, location of offensive/defensive numbers on the layout as related to playing positions around the table, and strategy for players with time constraints. Some strategies have suggestions on how to change the coverage by substituting or floating one to four numbers. The front of the book has wheel coverage diagrams, used as an index for 130 detailed drawings with text to follow. The book's frontage also has interesting "Wager and Time Table Guides"; one simply shows how it is possible for a player with only eighty one dollars (\$81.00) to play 21 games, at \$21.00 each game, have only defensive wins, and have \$21.00 remaining at the end of the 21 games.
