I got sucked into buying this on 's "Buy all three!" feature. It was only 4 or five dollars so I'm not upset that I bought it. Realistically though, every professor teaches contracts slightly different. Contracts is just one of those classes that you have to play the professor, not the subject. It handy to have around or to keep in the bathroom for when you want to cram for a few more minutes before finals but thats about it.I gave it five stars because its good for what it is. It has all of the key term and it is laminated and very sturdy. But as I mentioned above, play the professor, not the subject.

The Good:What these laminates do better than nearly any other resource is to give you a general overview and guide so you can understand where the material is going. Similar to the artist's technique where you have to create a vague rough sketch to understand proportion and relevance, these allow you to understand the significance of minutia and detail in the bigger schematic. Also great refresher if you are return after a long time away and your own notes don't make sense anymore.The Bad:The Contracts laminate is one of the weaker of the series. The guides cannot replace the actual text or class material, though of the entire series Constitutional Law and Criminal Procedure come closest.The Ugly:For those gunners out there, the laminate surface also makes these perfect to buy a second set to keep in the can for those "first thing in the morning" study

sessions.

I used this to study for the bar, after reviewing all my thiemis materials and I passed so it must have worked alright.

Quick study Contracts is great for first year law students. It gets to the meat of the issue without having to search for it. Like Cliff notes for Contracts.

Great study guide and gives a quick overview of legal terms so one does not have to look up the terms in Black's Law Dictionary. Nice heavy lamination protects this chart from spills and stains.

I like it for what it is, but get out your reading glasses since the font is way small. If you need a handy guide and you don't want to make your own outline, it's a good starting point.

So this is a very useful tool. It helped me organize an attack outline and a full outline. The case citations were useful as well.

have not have had a chance to utilize the yet. Will start my midterm, and looking to start working the lows of contracts
