Excellent book for understanding Contracts Law. It briefly presents the most famous cases that are generally taught in all law schools and it provides excellent arguments for both sides. Therefore, a student can learn to argue for both sides. It is the book that every student needs the last week before exam. Personally, I read "Principles of Contracts Law" by Robert Hillman before trying Chirelstein and Chirelstein is much better

Chirelstein's supplement is a quick read that covers the key concepts and most of the key cases covered in a first-year contracts course. It can be read shortly before finals as a review or consulted throughout the semester as new concepts are encountered. My contracts professor was very Socratic and reading the relevant chapters of this book throughout the semester was immensely helpful.

A must have for contracts! I read this twice cover to cover and it was the best understanding of

Contracts.

Even though this book is small, it's got great detailed explanations. It's not gonna work as your only supplement however.

If you want to learn contracts in two days. This is the book to do it with

This book is a MUST for any 1L student.
