Customer Reviews

I'll start by saying that this book has all of the information you might ever need, and that if you're confused on a very simple concept, then hey it's probably in here...somewhere. My issue with this book is that it is a terrible study aid for a law school final exam. I'm assuming that a person taking an exam would have some semblance of a familiarity with the subject before they even picked up this book. I mean heck, they took the class, presumably attended once or twice, and maybe even did some outlining before this. I bought this book to use as a way to read through some hypos and get some quick explanations (examples and explanations right?). This book is set up in the most inefficient manner ever. You waste 99% of time reading page long explanations of why a lender's security interest is valid and senior, before you get to the real point of the hypo: there's a purchase money security interest with super-priority that will trump the lender. OMG really?! Who didn't see this coming? All we really care about is the application of the relevant statutory sections. The answer literally could be two sentences. I am 100% aware of the fact that in an actual exam you will need to go through all of these steps, my issue is that the author does it needlessly for each explanation. The problem with this is that each explanation covers ONE ISSUE, and very rarely includes another issue, i.e. PMSI section tests PMSI, "Where to File" section tests only sufficiency the filing office chosen. Problem is that this is extremely inefficient. You have to read hundreds of examples just to learn the basics of each issue. 90% of law school exams are long, multiple page, issue spotting hypos. This book DOES NOT help you with issue spotting at all.
