Redfern And Hunter On International Arbitration

Synopsis

This leading commentary on international commercial arbitration, now in its sixth edition, is an essential guide for arbitrators and lawyers. Based on the authors' extensive experience as counsel and arbitrators, it provides an updated explanation of all elements of the law and practice of arbitration. This pack includes the hardback, ebook, and an android app version. This text provides an authoritative guide to the international arbitral process, from the drafting of the arbitration agreement to the enforcement of arbitral awards. The sixth edition has been updated to incorporate reference to the latest significant developments in the field such as the new LCIA, ICC and UNCITRAL Rules and new IBA Guidelines. There will also be an increased reference to international arbitral authority and practice from beyond Europe (China, India, and the US). Following the chronology of an arbitration, the book covers applicable laws, arbitration agreements, the establishment and powers of a tribunal, the conduct of proceedings and the role of domestic courts. In addition, it provides an in-depth examination of the award itself, and comments on the special considerations applying to arbitrations brought under investment treaties. It draws on examples of the rules and practice of arbitration at the International Chamber of Commerce, the London Court of International Arbitration, the American Arbitration Association, the International Centre for Settlement of Investment Disputes and the United Nations Commission on International Trade Law. Customer Reviews

This was my first and the only book I have acquired for my university studies. Although the book claims to cover the whole topic, in some chapters it fails to provide sufficiently detailed materials mainly due to the absence of the analysis of the relevant case law. A good example is the so-called 'investment arbitration' conducted under the auspices of the ICSID. As this is also a part of international commercial arbitration a reasonable reader would expect the book to contain more cases and materials regarding the topic. Instead of this the content of the relevant chapter of the book (Ch.8) contains only a brief overview of the topic and does not contain even a brief commentary of the main principles of the ICSID Convention which would be desirable. Additionally, there is no mention of the relatively recent withdrawal from the ICSID regime announced by a number of Latin American countries, such as Venezuela, Bolivia and Ecuador which is a very important issue per se since it has bearing on the core principles of the Convention and enforceability of the arbitral awards issued under it. Last but not least, the book does not contain any information about the so-called 'Emergency Arbitrator' procedure available now under a number of institutional arbitration rules and the topic of anti-suit injunctions is yet another point which has been touched upon by the author of present book very superficially.

I recently joined a study group on International Arbitration and was in need of a good study book that covered all the basics. After some research this is the one I bought and I'm very glad I did, because it does cover all the basics, it has a decent amount of case references and has been very helpful to me.

International Arbitration (Student Edition) by Redfern & Hunter provides an excellent professional guidance for who would like to pursue in International Arbitration / practicing International Arbitration.
